

## CFAP on Cull Cows and Herd Inventories

As more details of the CFAP are digested, dairy producers should not overlook potential payments for cull cows and breeding herd inventories. Farmers with animals raised for breeding purposes, including the production of offspring and lactation, may qualify for payment for that commodity. The payment rate for breeding cattle sold intended for slaughter during Q1 is \$92/head. The rate for the number of breeding cattle in inventory on any date the producer chooses between April 16 and May 15, 2020 is \$33/head.
